Editable PowerPoint Diagrams and Icons

Ver1.0, 15.09.2018

These InfoDiagram illustrations are built in Microsoft PowerPoint 2010 and provided in PPTX (Open XML) format.

The illustrations can be imported also into older PowerPoint versions (PPT files), MS Word or MS Excel,

MS Office applications for Apple, Keynote or OpenOffice Impress – in all applications able to open the standard PowerPoint file (PPTX format).

License note

We designed and share these slides to **help you making better awesome presentations.**

Use freely the graphics in your commercial presentations. Just don't resell it or share editable sources.

As a small design company, we will appreciate your help – **a feedback and recommending** our website and blog to others people making business presentations.

And don't forget to visit us at www.infodiagram.com, there is always some new design or use example on our blog. Thanks a lot.

Izabela, Marcin and Peter,
